**APPLIED
PROBLEMS OF
MECHANICS AND
MATHEMATICS**

SCIENTIFIC PROCEEDINGS

FOUNDED IN 2003

Issue 14

L'viv 2016

CONTENTS

Romaniv O. M., Sagan A. V., Firman O. I. Elementary reduction of idempotent matrices	7
Styopochkina M. V., Chervyakov I. V. The number of partially ordered sets (min,max)-equivalent to the 1-oversupercritical partially ordered set (1,3,5)	12
Antonova T. M., Vozna S. M. On one convergence criterion of branched continued fractions of the special form with real elements	16
Melnyk I. O. On the differential k -spectrum of differential semirings	25
Venherskyi P. S., Kyrlych W. M., Kokovska Y. V. Equation surface flow of kinematic wave approximation for channels with uneven bottoms.....	31
Hachkevych O. R., [Solodyak M. T.], Ivas'ko R. O., Hayevska L. M. To description of thermomechanical processes in an electroconductive nonferromagnetic layer under high-frequency one-sided induction heating	37
Protsyuk B. V. Thermoelastic state of piecewise inhomogenous thermosensitive hollow isotropic sphere	45
Kunets Ya. I., Matus V. V., Mishchenko V. O. Scattering of flexural waves from a hole of nonclassical form in plates using Timoshenko-Mindlin theory.....	53
Dovzhyk M. V., Nazarenko V. M. Fracture of half-space compressed along the near-surface penny-shaped crack in composite and elastic materials	58
Dovbnya E. N., Dundar O. D. Stationary temperature fields in endless thin shallow shells under the surface heat sources	64
Kozachok O. P., Slobodian B. S., Martynyak R. M. The effect of a real gas in intercontact gaps on the interaction between a body and a rigid base with a periodic array of rectangular grooves	69
Maksymovych V. M., Lavrenchuk S. V., Solyar T. Ya. Stress concentration near the openings and punch in anisotropic half-plane	76

Chyzh A. I., Tokovyy Yu. V. Analytical-numerical solution of a plane non-axisymmetric thermoelasticity problem in terms of displacements for a radially inhomogeneous hollow cylinder	85
Lila D. M. Elasto-plastic instability of thin rotating disc	92
Davydok A. Y. Correlation function and dispersion of the probable beta-distribution	99
Kharchenko V. M., Marchuk M. V., Pakosh V. S. Variant of refined theory of minimum order for pliable to shear and compression plates	107
Shevchuk V. A. Thermostressed state of plate with thin double-sided multilayer coating under conditions of nonstationary transfer	113
Horoshko V. O., Kalynyak B. M., Popovych V. S., Rakocha I. I. Mathematical modeling and determination of the thermo-elastic state of the three-layer hollow sphere at completed heat exchanges	123
Makhorkin I. M., Makhorkin M. I., Mastykash L. V. Analytical-numerical determination of thermoelastic state of multilayer transtropic bodies with simple geometry	133
Demydyuk M. V., Hoshovska N. V. Parametric optimization of the two-link manipulator motions with using orthogonal polynomials	140
