CONTENTS

Dzhaliuk N. S., Petrychkovych V. M. Parallel factorizations of matrices over rings and their connections	7
Zelisko V. R. Matrices and matrix equations over polynomial ring with involution	18
Komarnutsky M. Ja., Malojid M. O. Generalization of the theorem of De-Marco and Orsatti on the multiplication module	23
Bilavska S. I., Zabavsky B.V. Connection of an adequate rings with a clean rings	28
Vasyunyk I. S. Bezout domain, with Dubrovin's condition, in which all atoms are due-elements, with the unique maximally non-principal right ideal is elementary divisors domain	33
Nesteruk V. I. On nondegeneracy of Tate pairing for elliptic curves with good reduction over pseudolocal field.....	37
Kuz A. M., Ptashnyk B. Yo. Problem with integral conditions for the Klein-Gordon equation in a class of functions, almost periodic for spatial variables.....	41
Ilkiv V. S., Savka I. Ya. Metric estimate for the discriminant of a polynomial on linear manifold	54
Protsakh N. P. Mixed problem for ultraparabolic equation with memory term in noncylindrical domain	60
Dmytryshyn M. I. Approximations by exponential type vectors of regular elliptic operators.....	71
Taras O. G. A generalizftion of Arens' extension to spectra of analytic functions on a Banach algebra	78

Shukel' O. B. Some geometric properties of normal functors of finite degree in the asymptotic category	84
Grigorenko A. Ya., Efimova T. L., Brovko O. O., Gorbach L. A. Natural axisymmetric vibration of finite-length cylinders from polymer functionally gradient materials	92
Halazyuk O. V. Infinite cylinder stressedly-deformed state in the condition of axisymmetrical torsion achieved by the help of lateral surface loading.....	100
Zhydyk U. V., Nykolyshyn M. M., Flyachok V. M. Thermoelastic state of local heated laminated anisotropic doubly curved shallow shell.....	107
Marchuk M. V., Pakosh V. S., Lesyk O. F. Free vibrations of two-layered plate-strip with composite components pliable to transversal shear and compression	113
Makoviychuk M. V. Bending of a shallow spherical shell on elastic foundation taking into account the closure of collinear cracks	119
Nesplyak D. M., Mukha I. S. Numerical analysis of processes of thermoplasticity in rotor of steam turbine using theory of plastic yielding.....	125
Protsiuk B. V., Protsiuk O. B. Numerical approach to solving stationary heat conduction problems for layer bodies with avities parallelepiped form.....	133
Tokovyy Yu. V. Axisymmetric stresses in a finite elastic cylinder under normal pressure uniformly distributed over some part of the lateral surface	144
Popovych V. S., Yanishevsky V. V. The linearization parameters method in thermoelasticity problems of thin-walled thermosensitive constructional elements.....	152
Zarytsky S. V. Algorithm of investigation of limit equilibrium of a closed conic shell with longitudinal crack	162
Dudzinski Ja. M., Petryshchev O. M. Distribution of acoustic waves in liquid with cavstations.....	167
Kryvyy O. F. The interface circular inclusions in the non-uniform transversal-isotropic space	173
Kostkin K. K. Movement of fluids near the finit vortex chain.....	184
Loza I. A. About of non axisymmetrical waves in hollow multylayered cylinders with piezoceramic layers polarized in circumferential direction.....	188
Kotsyuba A. Yu. Flat contact tasks of theory of strain for the bodies of difficult form at the unset areas of their co-operation	197
