MATHEMATICS**

SCIENTIFIC PROCEEDINGS

FOUNDED IN 2003

Issue 12

L'viv 2014

CONTENTS

Dmytryshyn M. I. Interpolated scales of approximation spaces associated by positive operators	7
Antonova T. N., Hladun V. R. Some sufficient conditions for convergence and absolute stability to perturbations of branched continued fractions with real elements	16
Pereguda Yu. N. On a partially ordered set with a maximum 1-stable subset	27
Shchedryk V. P. The greatest common divisors and least common multiples of matrices over commutative Bezout domains	30
Popovych R. B. Finite fields in coincidence of basic field characteristic and extension degree	37
Gatalevych A. I. Bezout rings with zero divisors in Jacobson radical	46
Kuznitska B. M., Domsha O. V. Avoidable rings of range 1	49
Sagan A. V. Semihereditary quasi-euclidean rings	52
Pihura O. V. Commutative Bezout rings in which 0 is adequate is semiregular	56
Barabash G. M., Kholiyavka Y. M. Approximation of periods and values of two Jacobi elliptic functions	59
Bihun R. R., Tsehelyk G. G. Numerical method of minorant type for finding extremum random logarithmically convex function of two real variables	64
Rakocha I. I., Popovych V. S. Mathematical modeling and definition of thermostressed state of a two-component thermosensitive cylinder under conditions of complex heating	69
Protsyuk B. V., Syniuta V. M. The determination of thermostressed state of piecewise-inhomogenous thermosensitive sphere	78
Nykolyshyn M. M., Divejev B. M., Smolskyy A. H. Sound absorbing properties optimization of layered plates with the additional masses	85

Yasinsky A. V., Ierokhova O. V. Optimization of the transient temperature stresses in the given section of the half space, which is in a plane strain state	89
Kravchyshyn O. Z., Chekurin V. F. Interaction of harmonic elastic SH-wave normal incidence with in-homogeneously deformed planar layer	97
Artemiuk V. Yu., Kalynyak B. M. Determining the temperature field providing zero radial stresses in the inhomogeneous hollow sphere	104
Makhorkin M. I. Determination of stationary thermal state of a multiwedge system	112
Demydyuk M. V., Lytwyn B. A. Mathematical modeling of human gait with exoskeleton	120
Revenko V. P. Solution of 3d boundary value problem of elasticity theory for bodies of rotation	130
Bilushchak Y. I., Goncharuk V. Y., Chernukha O. Y. The mathematical model of non-interactive flows for description of mass transfer processes by two ways with cascade decay of particles	137
Davydok A. Y. Modeling and investigation of pairwise coupling effect of layer inclusions on the diffusion flow in a randomly nonhomogeneous strip under the beta distribution of phases	146
Kolodyazhny V. M., Mazmanishvili A. S. Stationary stochastic fields on the plane and algorithms of its generation	154
Litvinova Yu. S., Maksymenko-Sheiko K. V., Sheiko T. I. The <i>R</i> -functions using at building constructions modeling	165
Goriachko T. V., Marchuk M. V., Pakosh V. S. Free vibrations of layered cylindrical panels at dynamic nonlinear deformation	174
Lesyk O. F. The thermal stresses in an equally heated composite strip-plate into account the pliable to transversal compression	180
Piskozub L. G., Sulym H. T., Pasternak Ia. M. Influence of friction on hysteresis under cycling loading of solid with interface crack by the longitudinal shear	184
