CONTENTS

Oleh BUHRII
About uniqueness of the solution of some nonlinear parabolic variational inequality in unbounded domain 5

Andriy VUS
Integrable systems on the sphere S^2 with additional integral of fourth degree in the momenta 14

Yaroslav YELEIKO, Nataliya BUHRII
Existence of limit distribution for a family of functionals of semi-Markov processes 25

Mykola ZABOLOTSKYY
Regular growth of Blaschke product with angular density of zeros 38

Andriy ZAGORODNYUK, Zoryana MOZHYROVSKA
Hilbert spaces of entire functions of infinitely many variables . 44

Oleh SKASKIV, Oleh ZRUM
Adjustment of Fenton's inequalities for entire functions of two complex variables 56

Volodymyr IL'KIV, Tetyana MAHEROVSKA
Nonlocal two-point problem for second order strong hyperbolic equation with variable coefficients 69

Volodymyr MASLYUCHENKO, Olena FOTIY
Lower continuity of upper quasi-continuous multi-valued mappings 84

Olha MENSHYKOVA, Mykola PRYTULA
Soliton solutions for the inverse modified Korteweg-de Vries dynamical system 88

Volodymyr ONISHCHUK
Locally nilpotent groups that satisfy a weak minimality condition for non-abelian subnormal subgroups 94

Serhiy PIDKUYKO
On existance of the full involutive special collection of first integrals 100

Anatolij PRYKARPATSKY, Petro KALENYUK, Mykola PRYTULA
The separation variables method: from Euler to nowadays . . 105

Victor REVENKO
About application of a new analytically-numerical method to solved of the boundary-value problem for the biharmonic equation in the bounded domain with angular points 113

Valeriy SAMOYLENKO, Yuliya SAMOYLENKO
The wave of translation and mathematical theory of solitons . 126

Mykhaylo SYMOTYUK
Metric estimates of discriminant of polynomial which coefficients belong to smooth curve 149

Amaria ARARA, Mouffak BENCHOHRA, Lech GÓRNIEWICZ, Abdelghani OUAHAB
Controllability results for semilinear functional differential inclusions with unbounded delay 157

Orest ARTEMOVYCH
On rings with central inner derivations 182

Denis BLACKMORE, Natalia PRYKARPATSKA, Eugeniusz WACHNICKI, Marzenna PYTEL-KUDELA
The Cartan-Monge geometric approach to the characteristic method for Hamilton-Jacobi type equations and its generalization for nonlinear partial differential equations of higher orders 187

Mykola CHERNIKOV
Groups with normal infinite cyclic subgroups 220

Igor GURAN, Michael ZARICHNYI
On normality of the strong-weak topology 227

Yaroslav KHOLYAVKA
On a measure of algebraic independence of values of Jacobi elliptic functions. I 233

Halyna LOPUSHANSKA
Solutions with strong power singularities to nonlinear elliptic boundary value problems 247

Volodymyr POTOROCHA, Valeriy SAMOILENKO
Asymptotical solutions to singularly perturbed systems of differential equations with degenerations and impulses 261

Yuriy SYDORENKO, Marta POCHYNAYKO
Darboux transformations and scattering operators for Dirac's systems 278

Mykola BOGOLUBOV (jr.), Anatoliy SAMOILENKO, Anatoliy PRYKARPATSKY
Problems of quantum theory in works of the academician M.M.Bogolubov and his successors 289

Mykola Oleksiyovych Perestyuk 299

Yuriy Oleksiyovych Mytropolsky 302
